GLENCORE

WOMEN IN MINING

INTERNSHIP ROLE PROFILE

GENERAL DETAILS	
Role Title	Internship - Geotechnical Engineer
Department	Group HSEC & Human Rights
Reports to (manager)	Head of Geotechnical
Location	Site based role (TBC based on candidate's career interests and capabilities (including language) to one of Glencore's operations.
Date	July 2022 onwards (TBC)

CONTEXT

Glencore is one of the world's largest globally diversified natural resource companies. Its purpose is to responsibly source the commodities that advance everyday life. Glencore does this by delivering on its strategy to be active at every stage of the commodity supply chain. Its diversity by geography, product and activity, maximises the value it creates for its business and its diverse stakeholders. Glencore produces and markets more than 60 commodities, through approximately 150 assets and offices in over 35 countries. Glencore employs approximately 135,000 people.

PURPOSE

Glencore is keen to support a greater representation of women in the mining industry and is seeking emerging female talent for opportunities to learn at its operations.

This 2-3 months internship will take place at one of Glencore's operations within its extensive global portfolio. Glencore will work with you to best match your career interests and capabilities (including language) to one of its operations.

TYPICAL TASKS

The tasks/project areas involved in the internship have yet to be finalised however they are likely to involve the following work areas:

1. Site inspections for geotechnical hazards
2. Mapping and core logging
3. Collection and review of monitoring data including piezometers, prisms, inclinometers, radars
4. Assisting with compiling monthly reporting
5. Preparation of hazard reports
6. Participation in risk assessments
7. Liaising with other technical services teams such as operations, geology, surveying and mine engineering
